Address
Blk 6 Lot 11 Rocha St. Addas Village 4
Mambog IV, Bacoor Cavite

Education

2015-2020
Bachelor of Science in Information Technology
STI College Bacoor

2011-2015
King Solomon Integrated School

2005-2011
Mambog Elementary School

Language

English

Filipino

Experience

August 25, 2025 - Present
ASCENDION DIGITAL SOLUTIONS PHILIPPINES INC.

Backend Developer / Production Support

- **Backend Development**
- **Testing and Debugging Code**
- **Node.js**
- **PostgreSQL**
- **Object-Oriented Programming (OOP)**
- **Documentation**

PROJECTS

BANKING SYSTEMS (CONFIDENTIAL)

- Contributed to backend systems supporting banking and financial services platforms under strict confidentiality and security standards.
- Handled production monitoring, issue investigation, and resolution to maintain system stability.
- Collaborated with internal teams and external partners to address issues in both production and test environments.

RESPONSIBILITIES

- **Backend Development & Code Quality:** Developed, maintained, and supported backend services with emphasis on clean, scalable, and maintainable code. Performed thorough testing and debugging to ensure system reliability in production environments.
- **Production Support & Incident Management:** Acted as a primary production support engineer, monitoring live applications, identifying issues, and responding to incidents to reduce downtime and operational risk.
- **Log Monitoring & Root Cause Analysis:** Investigated application and system logs using AWS CloudWatch, identifying errors, performance issues, and anomalies. Conducted root cause analysis and proposed effective solutions for issues encountered in production and test environments.
- **Cloud & API Operations:** Supported backend services hosted on AWS, including AWS API Gateway and AWS Secrets Manager, ensuring secure configuration, reliable API communication, and stable runtime behavior.
- **Database Support:** Worked with PostgreSQL to analyze data-related issues, validate queries, and support backend operations.
- **Cross-Team & Partner Communication:** Coordinated closely with internal teams and external partners to communicate production issues, align on resolutions, and ensure timely fixes.
- **Documentation & Knowledge Sharing:** Authored and maintained technical documentation, including incident reports, troubleshooting guides, and system documentation to improve team efficiency and operational continuity.

June 1, 2020 - August 15, 2025
INFOPIPHANY I.T. SOLUTION

- **Web/ Mobile Development**
- **Object Oriented Programming**
- **Front-end Development**
- **Back-end Development**
- **Testing and Debugging Code**
- **Node JS(Express ,Sails)**
- **Software Framework**
- **UI/UX Design**
- **Database Design**
- **Documentation**
- **Vue JS(2, 3), Nuxt JS, Ionic Vue3**
- **Type Script**
- **MYSQL**
- **Git Commands**
- **HTML, CSS,SCSS**
- **Tailwind, Bootstrap**

PROJECTS

ELECTRONIC COMMERCE SYSTEM (Ecommerce)
Web App

- Develop an Electronic Commerce System (Ecommerce) to improve buying and selling of goods via internet, and transfer of payment via online transaction.

PAYMENT METHOD OPTIONS (Ecommerce)
Web App

- I integrate Different PaymentMethods Including Paypal, Paymaya and Braintree for Ecommerce.

PRODUCT MANAGEMENT

- Engineered a comprehensive product management system, enabling seamless CRUD operations for categories, products, and bundles. Seamlessly integrated with promotional management, allowing attachment of promotional codes/discounts to products and bundles. Streamlined user experience and enhanced functionality.

PROMOTIONAL MANAGEMENT

- Develop a dynamic promotional management system empowering users to effortlessly generate discounts and associated codes. Seamlessly integrated this system with product management, allowing attachment of discounts to specific products. Additionally, the system adeptly tracks and manages the products associated with each discount, enhancing efficiency and offering a seamless user experience.

FINANCE TRACKER

- Enhanced a Finance Tracker System by seamlessly extending a legacy platform. Revamped the front-end and server functionalities, significantly improving user experience and system efficiency. Implemented a sophisticated Multi-User Role functionality, ensuring tailored access controls and heightened security. My contributions modernized and elevated the system's capabilities.

- Developed a mobile version of the system, enabling users to manage finances conveniently on-the-go, while maintaining feature parity with the desktop version.

TIME LABOR SYSTEM

- Developed a time labor tracking application using Vue and TypeScript to enable employees to easily clock in, clock out, and report daily tasks in real-time.

MOBILE INVENTORY

- Developed a fully functional mobile inventory management system using Ionic Vue 3 and TypeScript, enabling users to efficiently track, manage, and organize inventory items across multiple categories.

Training & Support

- Assisted new hires by providing training on company technologies, tools, and workflows, ensuring smooth onboarding and helping them adapt quickly to their roles.

RESPONSIBILITIES

- **Full Stack Development:** Designed, developed, and maintained web and mobile applications using modern frameworks and technologies including Vue.js (2 & 3), Nuxt.js, Node.js (Express, Sails), Ionic Vue 3, and TypeScript.
- **Front-End & UI/UX Design:** Created responsive and user-friendly interfaces using HTML, CSS, SCSS, Tailwind CSS, and Bootstrap. Delivered intuitive designs with a focus on enhancing user experience and accessibility.
- **Back-End Development**: Engineered scalable back-end APIs and services using Node.js (Express and Sails), ensuring robust integration with front-end components and third-party services such as payment gateways(Paypal/Braintree).
- **Database Design & Management:** Designed and maintained efficient database structures in MySQL to support business operations, including inventory, product, promotional, and finance tracking systems.
- **Mobile Application Development**: Built mobile-first systems like a mobile inventory app and a finance tracker mobile version with Ionic Vue 3, ensuring seamless functionality and performance across devices.
- **System Integration & Feature Enhancement**: Integrated core features such as time labor tracking, multi-user roles for finance systems, and real-time reporting capabilities to optimize operational workflows.
- **Code Quality, Testing & Debugging**: Conducted comprehensive testing and debugging throughout the development lifecycle to ensure optimal performance and security standards.
- **Documentation & Technical Writing**: Authored detailed documentation for system architecture, codebase, APIs, and user guides to support maintainability and scalability.
- **Team Collaboration & Agile Workflow**: Collaborated closely with team members, including designers, developers, and team leads, in an Agile development environment to ensure timely delivery of project milestones.
- **User Training & Technical Support**: Trained end-users on system functionalities and provided ongoing support to troubleshoot issues, improve workflow efficiency, and ensure user adoption.
- **Onboarding & Mentorship**: Assisted in onboarding new team members by providing training sessions on tools, technologies, and company workflows to accelerate their integration into the team.

November 2023 - June 2024
INVESTPRO REALTY

- **Web Development**
- **Object Oriented Programming**
- **Front-end Development**
- **Back-end Development**
- **Testing and Debugging Code**
- **Software Framework**
- **Git Commands**
- **UI/UX Design**
- **Database Design**
- **Microservice Integration**
- **Documentation**
- **Assistant Team Lead**
- **MERN Stack**
- **Azure**

PROJECTS

REAL ESTATE SYSTEM
We App

- Developed a comprehensive Real Estate Management System that facilitates property search, allowing buyers to browse and select properties based on their preferences. Real estate agents can post property listings and manage their portfolios, while users can directly contact agents for inquiries. The platform also includes a commission processing feature, enabling seamless calculation and disbursement of agent commissions upon successful property sales, streamlining real estate transactions and improving overall user experience.

RESPONSIBILITIES

- **Full Stack Web Development (MERN Stack):** Designed and implemented both front-end and back-end components of a real estate management platform using the MERN (MongoDB, Express, React, Node.js) stack, ensuring responsive performance and efficient data handling.
- **Property Listing & Search Functionality:** Developed dynamic search filters and listing features that allowed users to browse properties based on customizable criteria, enhancing user experience and engagement.
- **Agent & User Management:** Built secure and scalable modules for real estate agents to manage property portfolios and for users to interact directly with agents through the platform.
- **Commission Processing System:** Engineered an automated system for tracking property sales and calculating agent commissions, significantly streamlining real estate transactions and financial workflows.
- **Microservices Integration**: Integrated microservices architecture to modularize functionalities and improve scalability, maintainability, and performance of the application.
- **UI/UX Design:** Designed user-friendly and visually appealing interfaces with a focus on usability, improving overall navigation and system accessibility for both agents and buyers.
- **Database Design & Optimization:** Designed efficient database schemas in MongoDB to support robust and secure data operations for property listings, user profiles, transactions, and communications.
- **Azure for Project Management & Repository Integration**: Utilized Microsoft Azure DevOps for task tracking, ticket management, and version control. Collaborated with the team through Azure Repos for pushing and reviewing frontend and backend code, ensuring streamlined development and consistent codebase management.
- **Testing & Debugging:** Conducted end-to-end testing, debugging, and performance optimization to ensure application stability, security, and cross-device compatibility.
- **Technical Documentation**: Authored comprehensive documentation covering system architecture, feature usage, and deployment processes to support future maintenance and onboarding.
- **Assistant Team Lead:** Assisted the Team Lead in managing day-to-day team operations, helping coordinate development efforts and ensuring smooth collaboration across the team. Took part in client-facing activities, including presenting demos to stakeholders and gathering feedback to align development with business needs.

Technical Skills

- Programming language: SQL Server, PHP, Node.js
- Cloud Platforms (AWS): AWS CloudWatch, AWS S3, AWS API Gateway, AWS Secrets Manager
- Databases: MySQL, MongoDB, PostgreSQL
- Basic Network Troubleshooting
- Oriented in Microsoft Office Application: Word, Excel, and PowerPoint
- Advance Knowledge in: Vue/Nuxt JS, Ionic, Sails, Node.js, MERN Stack
- Advance Knowledge in Using Lodash
- Knowledge in using WordPress to Create Website
- Experienced in QA Testing methodologies, including test case creation
- Version Control: Git commands (clone, pull, push, commit, branch, merge)
- Experience in Using GitLab
- Docker & Kubernetes
- WordPress and Shopify Developer
- Network Protocols: Understanding of common protocols such as TCP, UDP, DNS, HTTP/S, DHCP, and SNMP
- Network Troubleshooting: Experience using tools like ping, traceroute, and netstat to diagnose and resolve issues
- Documentation & Diagramming: Skilled in creating technical documentation and system diagrams
